DK - Montering af Elegance Junior Wall.

1

- Lav hul for skorsten.
- Skal ovnen monteres med friskluft bagud, skal der også laves hul til dette.

Hul for skorsten.

Hul for friskluft tilslutning.

2

- Der skal anvendes *4 skruer, som er godkendt til den pågældende type væg og som kan bære ovnens vægt.

3

- Ovnens løftes op på det fastspændte beslag.
- Ovnens fastgøres med den medfølgende bolt.

Tilførsel af forbrændingsluft.

Tilførsel af forbrændingsluft gennem bagvæg.

1. Lav hul i bagvæg.
2. **Røret for friskluft gennemføres i hullet og tilsluttes friskluftstuds.
3. Ovn monteres på beslag (se afsnit 5).

Tilførsel af forbrændingsluft under ovn.

D - Montage der Elegance Junior-Wand.

1

- Niedriges Loch für Schornstein.
- Wenn der Ofen mit Frischluftzufuhr von hinten montiert werden soll, muss dafür auch ein Loch geschaffen werden.

Loch für Schornstein.

Loch für
Frischluftanschluss.

2

- Es müssen *4 Schrauben verwendet werden, die für die betreffende Wand zugelassen sind und das Gewicht des Ofens tragen können.

*Nicht im Lieferumfang.

3

- Der Ofen wird auf den festgespannten Beschlag gehoben.
- Der Ofen wird mit dem mitgelieferten Bolzen befestigt.

Zufuhr der Verbrennungsluft.

Zufuhr der Verbrennungsluft durch die Rückwand.

1. Niedriges Loch in Rückwand.
2. **Das Rohr für die Frischluft wird durch das Loch geführt und am Frischluftstutzen angeschlossen.
3. Der Ofen wird auf dem Beschlag montiert (siehe Abschnitt 5).

Zufuhr der Verbrennungsluft unter dem Ofen.

Frischlufkasten muss
abmontiert sein.

**Nicht im Lieferumfang.

GB - Assembly of Elegance Junior Wall.

1

- Make a hole for the chimney.
- If the oven is to be assembled with a rear fresh air outlet, a hole must be made for it as well.

A hole for the chimney

A hole for fresh air supply

2

*Four screws approved for the wall type in question and capable of supporting the weight of the stove must be used.

3

- Raise the stove onto the fixed fittings.
- Use the supplied bolt to attach the stove.

Supply of Combustible Air

Supply of combustible air through a back wall

1. Make a hole in the back wall.
2. **The fresh air pipe goes into the hole and is connected to the fresh air connection piece.
3. The stove is mounted on fittings (cf. Section 5)

Supply of combustible air under the stove

F - Fixation au mur pour le modèle "Elegance Junior".

1

- Percer un trou pour le poêle.
- Si le poêle doit être monté de manière à ce que l'air frais sorte par l'arrière, on doit aussi percer un trou pour cela.

Trou pour le poêle.

Trou pour le
raccordement de l'air

2

- On doit aussi utiliser 4 vis*, qui sont reconnues pour le mur en question et qui peuvent supporter le poids du poêle.

*Vis non incluses.

3

- Le poêle doit être posé et maintenu sur ce support.
- Le poêle doit être fixé à l'aide du boulon fourni.

Alimentation en air de combustion

Alimentation en air de combustion à travers la paroi du fond.

1. Percer un trou dans la paroi du fond.
2. **Le tube pour l'air frais est inséré dans le trou et est relié au bec d'air frais.
3. Montage du poêle sur le support (voir section 5).

Alimentation en air de combustion dans le poêle.

S - Montering av Elegance Junior Wall.

1

- Gör hål för skorsten.
- Om kaminen ska monteras med friskluftsintag på baksidan ska det göras ett hål även för detta.

Hål för skorsten.

Hål för
friskluftanslutning.

2

- Det ska användas *4 skruvar som är godkända för den typ av vägg som ska bära kaminens vikt.

*Ingår inte.

3

- Kaminen lyfts upp på det fastmonterade beslaget.
- Kaminen monteras fast med den bult som medföljer.

Tillförsel av förbränningsluft.

Tillförsel av förbränningsluft genom den bakre väggen.

1. Gör ett hål i den bakre väggen.
2. **Röret för friskluft förs igenom hålet och ansluts till friskluftsstosen.
3. Kaminen monteras på beslaget (se avsnitt 5).

Tillförsel av förbränningsluft under kaminen.

Friskluftsboxen ska
monteras av.

N - Montering av Elegance Junior Wall.

1

- Lag hull for pipe.
- Skal ovnen monteres med friskluft bak, må det også lages hull til dette.

Hull til pipe skorsten.

Hull til friskluftstilkobling.

2

- Det må benyttes *4 skruer som er godkjendt for den aktuelle typen vegg og som kan bære vekten av en ovn.

*Ikke inkludert.

3

- Ovnens løftes opp på det monterte beslaget.
- Ovnens festes med medfølgende bolt.

Tilførsel av forbrenningsluft.

Tilførsel av forbrenningsluft gjennom bakvegg.

1. Lag hul i bakveggen.
2. **Røret for friskluft føres gjennom hullet og kobles på friskluftstussen.
3. Ovnens monteres på beslag (se avsnitt 5).

Tilførsel av forbrenningsluft under ovnen.

Friskluftboksen må
være demontert.

**Ikke inkludert.

NL - Montage van Elegance Junior Wall.

1

- Maak gat voor schoorsteen.
- Wordt er een haard geplaatst met verseluchtaansluiting aan de achterkant, moet daar ook een gat voor worden gemaakt.

Gaat voor schoorsteen.

Gat voor
verseluchtaansluiting.

2

- Gebruik *4 schroeven die zijn goedgekeurd voor het betreffende type wand en die het gewicht van de haard kunnen dragen.

*Niet inbegrepen.

3

- Til de haard op het vastgezette beslag.
- Zet de haard vast met de bijgeleverde bout.

Toevoer van verbrandingslucht.

Toevoer van verbrandingslucht via achterwand.

1. Maak gat in achterwand.
2. **Leid de buis voor verse lucht door het gat en sluit die aan op de verseluchttap.
3. Monteer de haard op het beslag (zie paragraaf 5).

Toevoer van verbrandingslucht onder de haard.

**Niet inbegrepen.

IT - Montaggio di Elegance Junior Wall.

1

- Praticare un foro per la canna fumaria.
- Se la stufa deve avere una presa per l'aria posteriore è necessario predisporre un foro nella parete.

Foro per la canna fumaria.

Foro per il collegamento
per l'aria

2

- Devono essere usate *4 viti; queste devono essere approvate per il tipo di parete ed essere in grado di sostenere il peso della stufa.

3

- Sollevare la stufa utilizzando la staffa di montaggio fissata alla parete.
- La stufa è fissata con le viti in dotazione.

Alimentazione dell'aria di combustione

L'alimentazione dell'aria di combustione avviene attraverso la parete posteriore.

1. Praticare un foro nella parete posteriore.
2. ** Il tubo per l'aria fresca viene introdotto nel foro e collegato al raccordo dell'aria.
3. La stufa viene montata sulla staffa (vedi sezione 5).

Alimentazione dell'aria di combustione sotto la stufa.

La scatola del filtro
deve essere rimossa
