

heightEqualizer

Equalize the height of elements to prevent elements from varying in size.
Elements are automatically grouped by their top offset position on the page.

Include

To include in your theme, add the following to your scripts file (webroot/js/scripts.js):

```
@prepros-append ../../../../webroot/vendor/vjm/heightEqualizer/heightEqualizer.js
```

Usage

Set selector for elements:

```
heightEqualizer.selector = '.my-custom-selector';
```

Enable debugging to console:

```
heightEqualizer.debug = true;
```

Equalize elements:

```
heightEqualizer.equalize();
```

Reset elements:

```
heightEqualizer.reset();
```
